

# Life Cycle of a Radish

 <p>First season: seed</p>	 <p>First season: seedling</p>	 <p>First season: seedling grows more leaves</p>
 <p>First season: plant has developed large bulb root. This is the stage where the radish is harvested.</p>	 <p>Second season: (if root was not harvested) plant has used energy stored in root to continue growing</p>	 <p>Second season: plant forms flower buds</p>
 <p>Second season: plant flowers</p>	 <p>Second season: plant produces seeds</p>	<p>Photos courtesy of A. Venegas</p>
